DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5, 6-9, 11, 12, 15, 16, 19-22, 25, and 33-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Candage et al., U.S. Patent # 5,959,490.

Fig. 1 of Candage et al. discloses a circuit comprising: transistors MP1, MP2 or MP5, MP6 can be read as a differential pair or a first amplifier; input terminals INP, INN can be read as a pair of differential input terminals; outputs at drains of transistors MP1, MP2 or MP5, MP6 can be read as output port or output node; VBB can be read as a gate bias voltage; transistors MP3, MP4 or MP7, MP8 can be read as an active load; ground can be read as a reference node (see spec. col. 3, lines 1-3, col. 4, lines 26-33).

Regarding claim 14, see spec. col. 3, lines 24-30.

Regarding claims 25 and 36, see spec. col. 3, lines 15-19.

Regarding claims 19-22, 25, although Candage et al. does not have his method written out structurally, the method resides inherently in his apparatus.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 26, 30, and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Candage et al., U.S. Patent # 5,959,490.

Although Candage et al. does not have an antenna connects to the input of the first amplifier, nor does he have a second amplifier connects to the output of the first amplifier, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to connect an antenna and a second amplifier to the amplifier of Candage et al. to have a practical use for the circuit (first amplifier) of Candage et al. since this is well known in the art and a matter of design choice.

Allowable Subject Matter

Claims 3, 4, 10, 13, 14, 17, 18, 23, 24, 27-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 9/8/05 have been fully considered but they are not persuasive. The amplifier in Fig.1 is a differential pair because they input differential input signals and output differential output signals.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
